Release Notes

1. Release Overview

Field	Details
Product Name	CADP Workspace
Release Version	Release 1.0.0 (15)
Release Date	June 9, 2026
Release Type	Patch / Bug Fixes
Prepared By	Development Team
Approved By	Ganagavathy
Environment	QA

2. Release Summary

This release of CADP Workspace Version 1.0.0 (15) focuses on platform performance and stability. Key highlights include optimized platform loading time, optimized feature design page loading time, and multiple bug fixes across the platform.

3. New Features

Feature ID	Feature Name	Description	Impact
–	Mobile	Native mobile application and mobile web are available in this build. Users can access CADP Workspace on mobile devices through both the app and the browser.	Mobile app and mobile web users

Feature ID	Feature Name	Description	Impact
–	Workflow – OCR Node	A new OCR (Optical Character Recognition) node is available in the Workflow builder. When added to a workflow, it extracts text from images or document files and makes the extracted content available as output variables for downstream nodes.	Workflow designers and users processing image or document data
–	OCR Component	A new OCR component is available in the Feature Builder. It allows users to upload an image or document and extract text directly within a feature form. General text extraction works out of the box. Field-level extraction (structured data extraction into specific fields) requires a paid API access token for OpenAI or Gemini, configured in the platform integrations settings.	Feature designers and end users handling image or document-based data entry
–	Erudite Management	A new knowledge management module available to top-level administrators (Cavin Admin). Admins can create and publish FAQs (with question, answer, and category), upload Documentation (PDF/DOC, max 5 MB), and upload Tutorial Videos (MP4/MOV/MKV, max 50 MB) about the organization, workspaces, and platform usage. Each item supports categorization (Account, Billing, General, Technical) and can be optionally pinned to the dashboard for quick access. End users can browse FAQs, read documentation, and watch tutorial videos through a self-service knowledge portal. Note: Erudite Management must be enabled in Role Management before use.	Top-level administrators managing platform knowledge content; all platform users consuming FAQs, documentation, and tutorial videos

4. Enhancements / Improvements

Enhancement ID	Module	Description	Benefit
	Platform	Optimized loading time across the platform.	Faster page loads and improved overall platform responsiveness.
	Feature Builder	Optimized feature design page loading time.	Faster rendering of the feature design page, improving the builder experience.

5. Bug Fixes

Bug IDs	528, 576, 624, 680, 691, 693, 698, 700, 709, 741, 760, 764, 766, 794, 799, 820, 829, 837, 850, 858, 860, 872, 874, 883, 889, 901, 902, 903, 905, 907, 908, 910, 911, 912, 913, 914, 916, 917, 918, 919, 921, 922, 924, 925, 926, 931, 933, 934, 935, 936, 938, 939, 942, 943, 944, 947, 949, 950, 951, 953, 954, 956, 957, 958, 959, 961, 962, 964, 966, 967, 971, 972, 973, 974, 975, 976, 978, 981, 982, 985, 988, 989, 990, 994, 996, 998, 999, 1000, 1001, 1002, 1003, 1005, 1007, 1008, 1009, 1010, 1011, 1014, 1016, 1017, 1021, 1023, 1032, 1036, 1038

6. Configuration Changes

Configuration	Description	Impact
None	No configuration changes are required for this release.	N/A

7. API Changes

API Name	Type	Description
None	N/A	No API changes are included in this release.

8. Known Issues

Issue ID	Description	Workaround
	Role Management Change Effect	Because some menu structures have changed, certain features may return a 403 status code. To resolve this, edit the role, select the platform feature, and save the role again.
	Scheduler with Integration Not Working	Use manual integrations wherever scheduled integration is required.
	Scheduler with Workflow Not Working	Use the conventional feature-wise approach wherever workflow scheduling is required.
	Formula Builder UI – Field Insertion Through Typing	This works in current fields. For external feature fields, it won't work, as there could be fields with same names from multiple features
	Formula Builder – AI-Based Formula Writing/Editing Not Implemented	Use manual formula entry instead.
364	Organization Details → Basic Info: Website URL accepts invalid URL formats without validation.	Expected: Validate the URL format and show an error message for invalid values, such as www.example or example@123.www.example
	Builder Tool Not Available on Mobile Web	The builder tool is not supported on mobile web. This is implemented as expected — builder functionality is restricted to desktop browsers by design.
	Mobile – SSO Login: Error Case Not Working	SSO login error scenarios (invalid credentials, expired tokens, etc.) do not display correct error messages on mobile. This is under review.
	Mobile – Formula Field Not Working in Tables & Charts	Formula fields are not evaluated correctly when used inside Tables and Charts on mobile. This is under review.

9. What to Test

- Login – Login, Sign In with Google (have to be configured in external providers in Tenants of metadata), Sign In with Microsoft (have to be configured in external providers in Tenants of metadata)
- **Create Application**
    1. Start from Scratch
    2. Choose/Create Vertical Template
- **User Management**
    1. Create/Manage Users
    2. Create/Manage Groups
    3. Import/Export Users
    4. Archive/Unarchive Users
    5. Locked Users
    6. Waiting Approval
    7. Please update existing users in each workspace.
    8. In the Users tab, when creating a new user, the Approval Type default is No Approval.
- **User Preferences**
    1. Profile update – first name, last name updating, profile picture updating.
    2. Change password
    3. Locale and Date-time updating
    4. Interface
        i. Theme change, color change. Color change here will override the brand color for that specific user of that workspace only.
        ii. Records per page is reflecting.
        iii. Language (currently only English accepted)
    5. Customization – module and features are visible based on visibility setting, quick access for that enabled feature is redirecting to feature transactions (records) page.
    6. Privacy & Security
    7. Miscellaneous – Default landing page, preferred currency, auto-save drafts, save interval
    8. Preferred user workspace
    9. Reset Preferences
- **Groups**
    1. Archive/Unarchive

- **Roles**
    1. Platform Roles
    2. Archive/Unarchive
    3. Workspace Role
    4. Feature Access Level
    5. Data Access Level
    6. User or Group Role Mapping
- **Workspace Management**
    1. Create Workspace
    2. Clone Workspace
    3. Archive Workspace
    4. Workspace Settings
- **Organization Management**
    1. Organization Details
    2. Organization Address
    3. Branding Details
- **Module/Feature Management**
    1. Create/Manage Module
    2. Create/Manage Features
    3. Design components for features
    4. Features and Modules can be published
    5. Audit Logs (Platform & Workspace)
    6. Version Logs (Workspace & Workflow)
    7. Staging
    8. Feature Card and Module Card Customization
- **Notification & Alerts**
    1. Email Notification & Templates – Create template and use template to send notification
    2. SMS Notification & Templates – Create template and use template to send notification
    3. WhatsApp Notification & Templates – Create template and use template to send notification
    4. In-App Notification & Templates – Create template and use template to send notification
    5. Push Notification & Templates – Create template and use template to send notification

- **Erudite Management**
  1. **Configuration (prerequisite)**
     a. Enable Erudite Management in Role Management before testing.
     b. Verify users without the role cannot access the Erudite Management module.
  2. **FAQs**
     a. Create a new FAQ with a question, answer, and category (Account, Billing, General, Technical).
     b. Verify the FAQ appears in the FAQ list after saving.
     c. Enable "Display this on the dashboard" and verify the FAQ is visible on the dashboard.
     d. Edit an existing FAQ and verify changes are saved correctly.
     e. Delete a FAQ and verify it is removed from the list.
     f. Search for a FAQ by keyword and verify correct results are returned.
  3. **Documentation**
     a. Upload a document (PDF or DOC, max 5 MB) with a name, description, and category.
     b. Verify the document appears in the Documentation list after saving.
     c. Attempt to upload a file exceeding 5 MB and verify a validation error is shown.
     d. Attempt to upload an unsupported file format and verify it is rejected.
     e. Enable "Display this on the dashboard" and verify the document is visible on the dashboard.
     f. Edit document details and verify changes are saved correctly.
     g. Delete a document and verify it is removed from the list.
  4. **Tutorial Videos**
     a. Upload a video (MP4, MOV, or MKV, max 50 MB) with a name, description, and category.
     b. Verify the video appears in the Tutorial Videos list after saving.
     c. Attempt to upload a file exceeding 50 MB and verify a validation error is shown.
     d. Attempt to upload an unsupported file format and verify it is rejected.
     e. Enable "Display this on the dashboard" and verify the video is visible on the dashboard.
     f. Edit video details and verify changes are saved correctly.
     g. Delete a video and verify it is removed from the list.
  5. **End User Access**
     a. Verify end users can browse and read FAQs, documentation, and tutorial videos.
     b. Verify items marked "Display on dashboard" appear on the user's dashboard.
     c. Verify items not marked for dashboard display do not appear on the dashboard.

- **Components**
    1. Layouts
        1. Column
        2. Section (various nested scenarios)
    2. Data Management (API Integration, Device Integration)
    3. Input Components (Phone Number, Password, Dropdown with Feature as Field Value)
    4. Specialized Input & Display
    5. Display and Interaction
    6. Media and Files
    7. Forms and Validation
    8. Utility Components
    9. Data Config Component
    10. Hyper Link Component
    11. Favorite Component
    12. Analytics & Report Components
        1. Chart Component
        2. Gantt Chart Component
        3. KPI Card Component
    13. Form UI
        1. Table component and Table level formulas, Summary row formulas
    14. Reusable Component
- **Workflow Management**
    1. Visual canvas for creating workflows
    2. Drag-and-drop node placement
    3. Node connection with visual links
    4. Canvas zoom and pan controls
    5. Grid snap for alignment
    6. Create new workflows
    7. Edit existing workflows
    8. Delete workflows
    9. List/view all workflows
- **Workflow Nodes – Control Flow**
    1. Start Node (workflow trigger point)
    2. End Node (workflow termination)
    3. Condition/Decision Node (if-else logic)

- **Workflow Nodes – Communication**
    1. Email Notification Node
    2. SMS Notification Node
    3. User Task/Approval Node
    4. System Notification Node
- **Workflow Monitoring**
    1. Execution history logs
    2. Workflow instance status tracking
    3. Node-level execution details
    4. Error logs and stack traces
    5. Approval node changes for user selection
    6. Added SLA and escalation reminder for approvals
    7. Added parallel workflow approval node
- **Printing Templates**
    1. QR Code – Generate and Print
    2. Barcode – Generate and Print
    3. Invoice – Generate and Print
- **Role-Based Dashboards**
    1. Role-based dashboard template creation
    2. Dashboard rendering based on created template
- **Scheduler & Task Scheduler**
    1. Create and use Schedule
    2. Create and use Task Schedule
    3. Event-based task schedule
    4. Schedule-based task schedule
    5. Schedule a notification
    6. SMS
    7. Mail
    8. WhatsApp
    9. Push
    10. In-App
    11. Schedule a report send (PDF) through mail from a configured email template.

- **Formula Builder Functionality**
    1. Same Feature
        a. Arithmetic
        b. Logical
        c. Comparison
        d. Text
        e. Math
        f. Date
        g. Conditional
        h. Miscellaneous
        i. Aggregate → with filter conditions and without filter conditions.
    2. Cross Feature
        a. Arithmetic
        b. Logical
        c. Comparison
        d. Text
        e. Math
        f. Date
        g. Conditional
        h. Miscellaneous
        i. Aggregate → with filter conditions and without filter conditions.
    3. Incompatible datatype operations, for example, arithmetic on a text input field, should show a validation error.
    4. Unrecognized fields, functions, or operators should show a validation error.
    5. If external fields are called without where() conditions, it should show MULTIPLE RECORDS FOUND ERROR in preview for non-aggregate functions/operations.
    6. Variables are not working. Review which variables should be displayed in the modal.

- **Formula Builder UI**
    1. On clicking a feature from the feature list, fields in the selected feature should be displayed, except for the current field, to prevent self-call loops.
    2. On selecting external feature fields, where() should appear in the modal.
    3. On selecting where(), the modal should automatically switch to the Feature and Fields tab.
    4. On hovering over a field, field information such as module name and feature name should be displayed.
    5. The Clear button or backspace should work as follows:
        i. First click of clear/backspace will select the token.
        ii. Next click of clear/backspace will clear that token.
    6. Empty formulas should not be saved.
    7. Formulas should not be saved without validation.
- **Integrations**
    1. Step 1: Go to the Integration Type field and select "Third-Party Software".
       Expected Result: A new dropdown field called Select Type should appear.
    2. Step 2: Check the options inside the Select Type dropdown.
       Expected Result: It should contain options including "Third-Party API" and "Google Drive".
    3. Step 3: Choose "Third-Party API" from the dropdown.
       Expected Result: The configuration fields specific to the Third-Party API should be displayed.
    4. Step 4: Change the selection to "Google Drive".
       Expected Result: The system should dynamically display the Google Drive configuration fields: Client ID, Client Secret, and Refresh Token.

10. What to Test on Mobile

- Login – Normal Login
- Workspace Switch
- Module List
- Feature List
- Components
- Feature Data – Create, View, Edit, Clone, Delete
- Dashboard
- Integration – Weighing Machine, Third-Party API (Budgie, SAP), and Payment Gateways (Stripe, Razorpay, and PayU)
- Theme
- Push Notification
- Workflow – Approve and Reject
- Charts – Feature Data
- Data Table – Feature Data
- Security – Prevent copy, paste, cut, and text selection
